The draft Access to Premises Standards were tabled in Parliament on 2nd December 2008. Once finalised, they will mean significant change in the requirements for access for new and upgraded buildings in Australia.

What do they mean? What will they cover? How will they work? What will professionals need to know? What changes will occur?

This Seminar will provide an overview of the draft Access to Premises Standards, an update of their current status and a practical perspective of how they will be applied.

Seminar fee \$120.00 plus GST per person (which includes relevant handouts and refreshments).
