Introduction – What is IATA

The Institute of Access Training Australia (IATA) is the training division of Access Audits Australia (AAA), a leader in disability and barrier free access consultancy, auditing and training services. We have successfully provided services to a wide range of community, government and business organisations since 1993.

The Institute of Access Training Australia (IATA) was established to provide professional development and training in 'Access for All'. This is aimed at people with responsibilities for ensuring equitable access is provided to all services, facilities, communications, events, information, employment and the built environment, for people with disabilities and a range of access challenges. Our training programs are highly sought after by many professionals.

IATA provides professional development and training for people wishing to gain and / or upgrade their skills and knowledge in relation to understanding, identifying and addressing an extensive range of access issues.

IATA programs offer education and support to people who are responsible for developing, facilitating and implementing Disability Access Policies and Action Plans as well as undertaking access appraisals of premises including buildings, streetscapes and outdoor spaces.

IATA professional development program leaders and trainers are drawn from a range of qualified trainers and access professionals who have been delivering professional development training programs in access improvement for over 20 years and are recognised leaders in the access industry. IATA team members have extensive knowledge and experience working with government, community and business sectors and have been recognised for their contribution.

Due to popular demand we are pleased to extend our range of courses and training programs. Details regarding this training and information on our range of publications are included in this booklet.

Early booking of any course or training session via telephone, fax or email is recommended, but written confirmation of requirements is essential. A booking registration form and an Access Awareness Handbook order form are included in this booklet. We look forward to supporting you and your organisation and encourage you to contact us if you require any further information or have any questions regarding our services.

Who Should Undertake IATA Courses and Programs

- Access Workers
- Asset Maintenance Staff
- Builders
- Child Care Workers
- Economic Development
- Event Organisers
- Home Care Workers
- Local Laws Officers
- Recreation Planners
- Statutory Planners
- Access Advisors
- Asset Managers
- Building Surveyors
- Customer Service Staff
- Employers
- Functions Managers
- Human Resource Staff
- Open Space Planners
- Sports Developers
- Streetscape Designers
- Architects
- Business Operators
- Marketing Personnel
- Disability Planners
- Engineers
- Government Officers
- Library Staff
- Playground Designers
- Social Planners
- Staff with Access Roles

What People Say About IATA Training Programs

- Best training session I have ever attended
- Fantastic, wonderful and informative. Well done and thank you
- Very informative – great presenters
- Excellent!
- Gave me heaps of confidence
- Great, informative, correctly pitched at the audience – length was perfect
- I learnt a lot
- A great insight into the problems experienced and how to react and deal with them
- Very interesting and engrossing training, delivered with a deal of humour, which was very much appreciated
- I enjoyed the combination of technical facts and human situations, which illustrates the importance of ramps / signage and other access supports
- Strategic Planning, Parks and the Works Depot staff must do this training
- This is my first day and I've already learned heaps!
- Great, added humour of presenters a bonus
- I want to thank you for a great informative session
- Fantastic - I got so much out of the training
- Certainly opens your eyes
- Wow!! What great presenters

How IATA Programs are Delivered

IATA incorporates a team of access professionals, who have developed a range of training programs, short courses and publications in response to identified needs. These programs are presented across Australia at independent locations as well as into workplaces that have a specific requirement.

IATA utilises a range of teaching methodologies that incorporate presentation, discussion, participant interaction, photographs and experimental activities and, where relevant, technical exercises as well as a good dose of humour.

These methodologies provide a range of diverse learning opportunities for participants and create a learning environment that supports all participants' preferences and learning styles. It also supports a 'safe' learning environment where participants feel comfortable in expressing their concerns or limitations and are supported in developing an improved understanding of access issues and solutions.

Participants are encouraged to challenge their existing knowledge and extend their boundaries whilst they expand their skill base.

The aim of IATA programs is to provide participants with knowledge and confidence as well as a practical Tool Kit to use when undertaking their work.

IATA Trainers and Presenters

IATA draws from a pool of experienced and qualified trainers with extensive expertise in a broad range of access issues. These trainers include access professionals who are Accredited or Associate Members of the Association of Consultants in Access Australia (ACAA), as well as qualified trainers who have also undertaken access studies overseas. The training team also includes award winning professionals in the access industry who have implemented extensive access projects both within Australia and overseas.

Trainers in specialist access areas as well as industry leaders are also involved to further complement the IATA training team in program development and delivery.

IATA Training Team

Joe Manton – Director – Accredited Access Consultant

Ms Joe Manton, Director of IATA is an Australian Accredited Access Consultant and qualified Trainer. She is a member of the committee of Management of the Association of Consultants in Access Australia (ACAA) and Convenor of the Victorian Access Consultants Network. Joe has undertaken access studies overseas and is a Fellow of the Williamson Community Leadership Program. She is a Member of the Australian Institute of Training and Development (AITD) and an affiliate of the Australian Institute of Building Surveyors (AIBS). Joe is a highly regarded access professional with more than 30 years working with governments, businesses and organisations to improve access for all. She has been recognised for her work in the area and is a highly sought after presenter.

Joe has undertaken many hundreds of access audits and appraisals as well as the development of many Disability Action Plans and other access research and improvement projects. She leads a multi-disciplinary team of experienced access professionals and trainers who have extensive skills gained from both professional and personal experience in addressing a wide range of access issues. *GDWA, ACAA, AITD, WCLP, Cert IV WTA, AIBS*

accessinstitute@bigpond.com www.accessinstituteaustralia.com.au

Kellie Millar - Senior Access Consultant

Kellie Millar has extensive experience both in Australia and the United Kingdom that provides the basis for a comprehensive and detailed appraisal of access barriers and recommendations to remove these. Kellie's understanding of technical access issues including relevant Standards and regulations provides the basis for high quality access audits and training provision. Her knowledge of technical access issues is second to none. She is a member of the Association of Consultants in Access Australia (ACAA) and a qualified trainer. *ACAA, Cert IV WTA*

Anthony Nichols – Training and Access Consultant

Anthony Nichols is a sought after presenter who has extensive experience and expertise in developing and presenting disability access training to a wide range of organisations. He is a qualified trainer and his personal experience of disability provides the basis for practical and insightful presentations as well as interesting and fun filled training sessions. Anthony is also an important member of the access appraisal team and is an accredited member of the Association of Consultants in Access Australia (ACAA). *ACAA, BM, Cert IV WTA*

Nicole Maslin – Research, Marketing, Community Engagement Consultant

Nicole Maslin is highly skilled in community engagement and has worked extensively with businesses and organisations to develop and improve services, programs, facilities and events which incorporate access for all. She is a dynamic business strategist with a Masters in Marketing. Nicole is the President of Community Business Centres Victoria and has extensive experience in implementing a wide range of Good Access is Good Business initiatives. *BA, GDB, Masters Marketing*

Michael Wheeler – Professional Development and Training Consultant

Michael Wheeler is a teacher with more than 25 years experience working with marginalised communities. He is a prolific writer and has consulted on a variety of teaching mediums for use in training programs relating to access for all. He has undertaken access audits on a range of community facilities and his curriculum development and implementation skills are second to none. Michael is an associate member of the Association of Consultants in Access Australia. *(ACAA) ACAA, BA, Dip Ed*

Lucas Wheeler - Training and Technical Communications Consultant

Lucas Wheeler is part of the IATA management and training team. He has been involved in a wide range of access initiatives and presents as part of the training and professional development team. His high level technical communication skills and creativity support development of a range of training mediums. Lucas' perspective on issues relating to young people with disabilities provides a unique insight to IATA projects. He is currently completing a Bachelor of Business and is an associate member of the Association of Consultants in Access Australia (ACAA).

Guest Presenters

Guest presenters in the IATA team include a range of access professionals such as architects, Vision Australia personnel, Building Surveyors and trainers with disabilities, as well as other professionals with extensive knowledge and skills. These presenters participate in sessions to provide specific information and perspectives based on their extensive experience to support a wide variety of educational and informative programs.

IATA Courses and Training Programs

What is included:

- Minimum of 2 dynamic and professional presenters, including at least one presenter living with a disability, who are members of ACAA and AITD
- opportunities for experiential learning
- discussions with people with disabilities
- utilisation of audio visual material where appropriate
- provision of training handouts
- Certificates of Participation

If courses or programs are provided in your organisation, the following is required:

- screen for use with data presentation
- accessible training room
- refreshments for participants on arrival and at breaks
- seating for up to 20 participants
- registration table, head table for trainers' equipment
- venue and accessible toilet suitable for a person using a wheelchair

An overview of each session, including costs, is provided in this **Training Courses and Publications Guide** along with a range of feedback from satisfied clients who have participated in our training programs. N.B. Additional charges for travel and accommodation, if required, may apply.

Certificate in Access Appraisal – 2 day courses

Overview

Many people are often required to identify the key access issues that create barriers for people with disabilities and other access challenges when moving through and using facilities. Identification of these barriers can be used to assist in the development of action plans for upgrade and maintenance of facilities, improving management practices at facilities and in responding to users' complaints regarding access to facilities.

These barriers may have occurred due to lack of appropriate access consideration in the design of the facility, the inappropriate layout of the facility, the lack of links between elements of the facility or the management practices at the facility.

An Access Appraisal, whilst not as detailed as an Access Audit (*undertaken by an Accredited Access Auditor*), can greatly assist in identifying the key elements that need to be addressed to improve 'access for all' to the facility.

An Access Appraisal includes identification of physical access barriers as well as other practical issues that can impact on the usability of the facility. It provides recommendations for action to assist in the management of the facility and to support improved access for all users, including people with disabilities, older adults and people using mobility aids such as wheelchairs, prams, strollers or delivery trolleys.

The 'shadowing' of a person using a mobility aid is an important component of the courses, as are explanations, demonstrations and photographs of a variety of access issues relating to mobility, hearing and vision impairment that are often unintentionally designed into facilities. Solutions for removing barriers are discussed and identified.

IATA

Institute of Access Training Australia

professional & development & training

92 Old Eltham Road Lower Plenty Victoria 3093 Telephone 03 9431 3472 SMS 0419 134 849

accessinstitute@bigpond.com www.accessinstituteaustralia.com.au

Course participants also have ample opportunity to ask questions and discuss any aspects of the Access Appraisal process. The courses include undertaking an Access Appraisal of a facility and review of the process. They provide a 'hands on' opportunity for participants to gain an acute awareness of the key issues that must be considered in the design, development, maintenance and management of accessible facilities.

In order to gain the Certificate of Access Appraisal, participants are also required to successfully complete a 60 minute assessment, comprising both multiple choice and short answer questions and submit an Access Appraisal for review within one month of course completion. For further information see the following pages.

Certificate in Access Appraisal – Buildings – 2 days

This unique access course is ideal for people who have responsibility for reviewing, planning, designing, managing or maintaining buildings, as well as those who are required to provide advice to others regarding access issues in the built environment.

These issues can incorporate those experienced by people with disabilities and other access challenges including users of wheelchairs, scooters and prams, as well as people with vision and hearing impairments and cognitive issues.

The course provides a framework for participants to undertake an Access Appraisal of a building and covers the essential **key components** of access to buildings including:

- Overview of disability access issues
- Overview of relevant State and Federal legislation, Access to Premises Standards and Australian Standards for Access and Mobility
- Identification of key access issues, barriers and solutions
- Development and use of an Access Appraisal Checklist
- Undertaking an Access Appraisal of a sample facility
- Reviewing and testing of knowledge learned
- Certificate of Access Appraisal is awarded

On completion a **Certificate of Access Appraisal - Buildings** is awarded.

Duration: 2 days plus assessment task

Fee: \$1,300 per person

Course Code: C1

Certificate in Access Appraisal – Parks, Playgrounds and Open Space – 2 days

This newly developed access course is ideal for people who have responsibility for reviewing, planning, designing, managing or maintaining parks, playgrounds or open space, as well as those who are required to provide advice to others regarding access issues in these areas.

These issues can incorporate those experienced by people with disabilities and other access challenges including users of wheelchairs, scooters and prams, as well as people with vision and hearing impairments and cognitive issues.

The course provides a framework for participants to undertake an Access Appraisal of a park and its facilities and covers the essential key components of access including:

- Overview of disability access issues
- Overview of relevant State and Federal legislation and Australian Standards
- Identification of key access issues, barriers and solutions
- Development and use of an Access Appraisal Checklist
- Undertaking an Access Appraisal of a sample facility
- Reviewing and testing of knowledge learned
- Certificate of Access Appraisal is awarded

On completion a **Certificate of Access Appraisal – Parks, Playgrounds and Open Space** is awarded.

Duration: **2 days plus assessment tasks**

Fee: **\$1,300 per person**

Course Code: **C2**

Certificate in Access Appraisal – Streetscapes 2 days

This newly developed access course is ideal for people who have responsibility for reviewing, planning, designing, managing or maintaining streetscapes, as well as those who are required to provide advice to others regarding access issues in streetscapes.

These issues can incorporate those experienced by people with disabilities and other access challenges including users of wheelchairs, scooters and prams, as well as people with vision and hearing impairments and cognitive issues.

The course provides a framework for participants to undertake an Access Appraisal of a streetscape and covers the essential key components of access to streetscapes including:

- Overview of disability access issues
- Overview of relevant State and Federal legislation and Australian Standards
- Identification of key access issues, barriers and solutions
- Development and use of an Access Appraisal Checklist
- Undertaking an Access Appraisal of a sample streetscape
- Reviewing and testing of knowledge learned
- Certificate of Access Appraisal is awarded

On completion a **Certificate of Access Appraisal - Streetscapes** is awarded.

Duration: 2 days plus assessment tasks

Fee: \$1,300 per person

Course Code: C3

accessinstitute@bigpond.com www.accessinstituteaustralia.com.au

Addressing Access in the Built Environment – 1 day

Many people in a wide range of roles need to be familiar with the updated requirements for access to buildings and facilities. This session provides an overview of legislation including the Disability Discrimination Act (DDA) and key Standards and regulations and issues that must be considered in the planning, design and development of accessible buildings and facilities.

The session incorporates information regarding the proposed Access to Premises Standards and provides an effective framework for all people who are responsible for access to buildings and facilities.

The session also includes practical perspectives relating to access barriers and identification of access solutions, and each participant receives a 'Tool kit' for use 'on the job'.

Duration: 1 day

Fee: \$550 per person

Course Code: C4

IATA

Institute of Access Training Australia

professional & development & training

92 Old Eltham Road Lower Plenty Victoria 3093 Telephone 03 9431 3472 SMS 0419 134 849

accessinstitute@bigpond.com www.accessinstituteaustralia.com.au

Developing a Disability Action Plan – 2 days

Many organisations have a statutory requirement to develop and implement a Disability Action Plan. Most understand that this process establishes a proactive approach to improving access and provides opportunities for all people to equitably access services, facilities, communications, employment and planning systems, as well as reducing the risk of complaints under the Disability Discrimination Act 1992 (DDA).

The task of facilitating the development of an effective Disability Action Plan is often delegated to a specific person within an organisation, which can be a daunting prospect for the delegate.

This two day course provides participants with the framework for facilitating the development of an effective Disability Action Plan within their organisation. It covers the key elements of effective Disability Action Plan development to comply with the requirements of the Disability Discrimination Act (DDA) as follows:

- What is a Disability Action Plan (DAP)?
- Why develop a DAP?
- What are the key elements of an effective DAP?
- Who should be involved in the DAP development process?
- How to engage relevant stakeholders in the DAP development process
- DAP report framework
- DAP implementation
- DAP monitoring
- DAP review and evaluation

Duration: 2 days

Fee: \$1,000 per person

Course Code: D1

92 Old Eltham Road Lower Plenty Victoria 3093 Telephone 03 9431 3472 SMS 0419 134 849

accessinstitute@bigpond.com www.accessinstituteaustralia.com.au

Introduction to the Disability Discrimination Act (DDA) and Disability Access Awareness

An understanding of the Disability Discrimination Act (DDA) is crucial for all staff within an organisation.

This introductory session provides participants with a basic understanding of the DDA. It provides a framework for participants and organisations to respond appropriately to a wide range of access issues and to understand compliance with the intent of the Disability Discrimination Act (DDA). It will assist managers and staff who have responsibility for ensuring that programs, policies and practices, communication, information and employment process are accessible to all.

This session also raises awareness of practical issues in relation to access for all utilising a range of mediums. Professional trainers with personal experience of disability detail a variety of access challenges and discuss how these can be overcome with thoughtful planning and application of the DDA.

Duration: 3 hours

Fee: \$160 per person (minimum of 10 participants or equivalent fee)

Session Code: L1

IATA

Institute of Access Training Australia

professional & development & training

92 Old Eltham Road Lower Plenty Victoria 3093 Telephone 03 9431 3472 SMS 0419 134 849

accessinstitute@bigpond.com www.accessinstituteaustralia.com.au

Understanding the Access to Premises Standards

The draft Access to Premises - Buildings Standards were tabled in parliament on December 2nd 2008. Once consultation is finalised in 2009, it is expected that these Standards will be legislated and introduced. They will mean significant change in the requirements for access for new and upgraded buildings in Australia.

This session provides an overview of the draft Access to Premises Standards, an update of their status and practical examples of how they will apply to buildings, using a sample multi purpose building as a template.

The session highlights the new requirements for access to buildings and demystifies the issues related to these new Standards.

The session is a must for all people who have responsibility for reviewing, planning, designing, managing or maintaining buildings as well as those who are required to certify new works or provide access advice to others.

Duration: **2 hours**

Fee: **\$130 per person (minimum of 10 participants or equivalent fee)**

Session Code: **L2**

General Disability Access Awareness for All

This general session is beneficial for all staff in any organisation, particularly those who don't even realise that access issues affect them. It is designed to raise the overall level of awareness of participants, in relation to physical, environmental, attitudinal and communication issues that often create access barriers for people with a variety of disabilities, as well as older adults, people with prams and pushers and delivery personnel.

The session is dynamic and fun. It allows participants to experience a range of access challenges and understand the impact of a variety of disabilities on people. Participants also learn how, in many cases, these barriers can be easily overcome with appropriate planning and forethought.

Duration: 2 hour and 3 hour sessions available

Fee: \$1,600 for 3 hours and \$1,300 for 2 hours (minimum of 10 participants or equivalent fee)

Session Code: A1

IATA

Institute of Access Training Australia

Barrier Free Access Awareness for Technical Staff

This session is designed for staff working in technical areas such as building, engineering, design and maintenance that require a more detailed understanding of barrier free access issues, including standards, codes and guidelines.

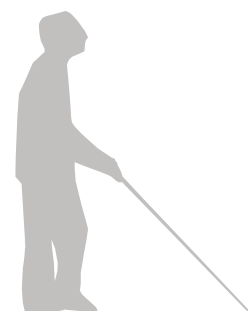

Using a 'shadowing' technique, it also provides the opportunity for participants to experience access challenges through the eyes of a person with a disability, who is a part of the IATA training team.

This 'hands on' experiential component of the session is very powerful and provides a good understanding of the practical application and need for the variety of regulations that must be met. The concept of 'barrier free access' is explored and participants gain a greater awareness of the scope of access for all.

Duration: 3 hours

Fee: \$160 per person (minimum of 10 participants or equivalent fee)

Session Code: A2

IATA

Institute of Access Training Australia

Barrier Free Access Awareness for Architects, Designers and Builders

Building industry professionals have extensive responsibilities under the Disability Discrimination Act (DDA); however, little material is provided in their professional training covering these areas.

This session has been designed to assist building industry professionals gain an understanding of the range of access issues and challenges that must be considered in the design, planning and development of a broad range of premises. The definition of premises, as interpreted by the DDA, includes both indoor and outdoor areas.

This session provides the basis for understanding 'barrier free access', as well as relevant legislation and Standards and highlights the benefits, both social and financial, of providing access for all.

Participants will have the opportunity to explore a variety of theoretical and practical issues.

Duration: **2 hours**

Fee: **\$130 per person (minimum of 10 participants or equivalent fee)**

Session Code: **A3**

Understanding Barrier Free Access

Barrier free access is the cornerstone of an effective and accessible built environment for all. It is a principle that has been embraced worldwide and supports the intent of the Disability Discrimination Act (DDA).

This general session provides an overview of barrier free access with examples of a variety of projects and developments that have been designed based on this principle. It provides participants with an understanding of the benefits and opportunities of barrier free access as well as the requirements to comply with relevant legislation, Standards and guidelines.

Key elements of barrier free access are highlighted and a checklist of issues to consider is provided to each participant.

Duration: 3 hours

Fee: \$160 per person (minimum of 10 participants or equivalent fee)

Session Code: B1

IATA

Institute of Access Training Australia

Understanding Barrier Free Access for Statutory Planners and Building Certifiers

Statutory planners and building certifiers are required to ensure that developments and premises they are responsible for comply with the requirements of barrier free access under the Disability Discrimination Act (DDA). All new developments (excluding residential premises), must provide extensive access for people with a variety of disabilities.

This session highlights the key areas that must be considered in any development and explores the variety of access issues that are involved in the planning and certification of premises.

It also provides an overview of the responsibilities of statutory planners and building certifiers as outlined by the Australian Human Rights Commission in ensuring that responsibilities under the Disability Discrimination Act are met.

A Checklist of issues to consider is provided to each participant.

Duration: 3 hours

Fee: \$160 per person (minimum of 10 participants or equivalent fee)

Session Code: B2

Improving access in Playgrounds, Parks and Outdoor areas

The Disability Discrimination Act (DDA) definition of premises includes a wide range of external spaces including playgrounds, parks and other outdoor areas.

It is therefore important to ensure that these areas are accessible to everyone including people with disabilities, parents with prams or grandparents who are enjoying a day out with the family.

This session provides an overview of the relevant legislation and highlights the key areas that must be considered in any outdoor development to ensure appropriate barrier free access is provided.

It provides an opportunity to explore an outdoor space on site, which assists in identifying the access barriers that can be eliminated with appropriate planning.

This practical session assists participants to better understand the range of access issues and to 'shadow' a person with a disability to gain an awareness of specific issues, access challenges and solutions to these.

A Checklist of access issues to consider is provided to all participants.

Duration: 2 hours

Fee: \$130 per person (minimum of 10 participants or equivalent fee)

‘Joining the Dots’ – Understanding Tactile Ground Surface Indicators (TGSIs)

This session is ideal for professionals with responsibility for specifying, installing and maintaining tactile ground surface indicators. Key areas covered include legislation, selection, installation, maintenance, pros and cons and issues and challenges.

Information will be provided in relation to the rationale and use of TGSIs as well as appropriate configurations. An overview of the various types of TGSIs that are commonly available and used will be provided and the pros and cons of each will be identified. Information relating to maintenance of TGSIs and the traps of overuse will also be explained utilising photographs and samples.

Participants will be able to discuss issues and photographs highlighting appropriate, as well as inappropriate installations, to assist with product selection, layout design, use and installation. Specific examples can be included for review.

An optional 'walk and talk' through a local area can also be incorporated.

Duration: 3 hours

Fee: \$180 person (minimum of 10 participants or equivalent fee)

Improving access in Pedestrian Areas, Streetscapes and Footpaths

Footpaths, streetscapes and pedestrian areas have, for many years, been the subject of significant complaints regarding access and barriers. Most local Councils have, or are currently introducing, a range of outdoor street trading and footpath policies to try and ensure barrier free access is not compromised by inappropriate footpath trading.

In addition to this, a wide range of access issues must be considered in creating accessible pedestrian areas including design, installations, treatments, contrasts, landscaping and wayfinding, to support access for all users.

This session assists participants who are responsible for ensuring good access is provided throughout pedestrian areas, to better understand the legal requirements for access, as well as to develop appropriate strategies to respond to access issues.

The session explores a range of options for providing 'access for all' in pedestrian areas and highlights what a variety of Councils and other organisations have done to achieve barrier free access. It also discusses the various awareness tools that can be utilised to gain support and assistance from businesses and traders, whilst new approaches to access are being developed and implemented.

A Checklist of access issues to consider is provided to each participant.

Duration: 2 hours

Fee: \$130 per person (minimum of 10 participants or equivalent fee)

Understanding access for Management and Maintenance staff – a practical approach

Often drawings and plans are fine, but the management, maintenance and upgrade of premises can create access barriers or barrier free access depending upon how the work is implemented.

This practical session is aimed at staff that have responsibility for managing, maintaining and upgrading premises, including buildings and outdoor spaces.

It is a combination of information regarding the 'whys' of barrier free access so that participants understand the need to provide access for all, as well as an exploration of the key issues that can create access barriers for many people.

A practical 'walk through' of premises is provided so that participants can gain first hand knowledge of the areas to be aware of, including barrier free access design principles and key access mistakes.

Opportunities to discuss issues of particular relevance to participants' work areas and ask questions are also provided.

Duration: 2 hours

Fee: \$130 per person (minimum of 10 participants or equivalent fee)

Footpath Trading Policies - Developing, Consulting, Implementing

The provision of good access along footpaths in local shopping precincts is very important for both pedestrians and traders. Commercial advertising and trading along footpaths and within streetscapes is often seen as important by traders and the ongoing developing café culture within some local shopping centres has been enhanced in many areas by outdoor dining, but conversely a range of access barriers and safety issues have been created for pedestrians and other users of footpaths. In order to meet the needs of all users it is necessary to consider the requirements of the Disability Discrimination Act (DDA) and the concept of 'Access for All' and to raise awareness of the benefits of adopting this philosophy for both traders and pedestrians.

This session is designed to assist staff who are responsible for developing and implementing Footpath Trading Policies. It provides a framework for this process that supports an effective and smooth transition from current to new and improved practices. It will assist staff to identify the benefits and opportunities of Footpath Trading Policies and includes a Tool Kit.

The session includes a wide range of photographic examples of 'policies in action' to assist in highlighting the key considerations and solutions to specific issues that can arise in developing and implementing Footpath Trading Policies.

Dynamic, professional trainers with extensive experience in Footpath Trading Policy development provide this highly regarded workshop with plenty of time for participant discussion, questions and interaction.

Duration: 1.5 hours

Fee: \$110 per person (minimum of 10 participants or equivalent fee)

Session Code: B9

Footpath Trading Policies - Information Session for Traders

The provision of good access along footpaths in local shopping precincts is very important for both pedestrians and traders. Commercial advertising and trading along footpaths and within streetscapes is often seen as important by traders and the ongoing developing café culture within some local shopping centres has been enhanced in many areas by outdoor dining, but conversely a range of access barriers and safety issues have been created for pedestrians and other users of footpaths. In attempting to meet the needs of all users it is necessary to consider the requirements of the Disability Discrimination Act (DDA) and the concept of 'Access for All' and to raise awareness of the benefits of adopting this philosophy for all users.

This session is designed to inform traders of the rationale, benefits and opportunities of a Footpath Trading Policy. It will dispel myths and traders' concerns and provide a range of practical, positive and easy to implement ways that traders can benefit from providing good access along the footpath as well as improving access to their business and services.

The session includes a wide range of photographic examples of 'policies in action' to assist in highlighting the key considerations in achieving access for all.

Dynamic, professional trainers with extensive experience of Footpath Trading Policy development provide this highly regarded workshop with plenty of time for participant discussion, questions and interaction.

Improving Access to Children's Services

Most children's services are subject to State regulations regarding their operation. These regulations often create conflict with the requirement for barrier free access; however, appropriate access must still be provided for all users.

This session provides an overview of the relevant legislation and explores the practical application of this in relation to meeting both the requirements of the Children's Services Regulations and the Disability Discrimination Act (DDA).

The session explores access for both children and adults with disabilities as well as staff, parents with prams and delivery personnel. It highlights the key areas that must be considered in providing appropriate access and provides suggestions for practical solutions to encourage barrier free access which support children's safety, whilst promoting independence for all.

A Checklist of access issues to consider is provided for each participant.

Addressing Access Issues in Local Communities

Many local communities have developed Access Advisory Committees to assist in improving access across a wide range of areas and issues.

Many of these committees include people with disabilities, some of whom have extensive experience, whilst others may be new to this area of involvement.

This session provides an overview of the roles of the three levels of government within Australia in relation to access and disability issues i.e. federal, state and local. It provides participants with an understanding of how they can effect changes to improve access and prioritise issues for action that are likely to receive support at the various government levels. In addition, the issue of community and corporate support is also explored.

The aim of the session is to provide a framework for Access Advisory Committees to establish work plans and priorities for their term of office. It explores the role of Access Advisory Committees and the relevant contribution they can make to improving access for all.

Duration: 2 hours

Fee: \$130 per person (minimum of 10 participants or equivalent fee)

Good Access is Good Business – Access Awareness Handbooks

We have produced a series of Access Awareness Handbooks designed to complement our training programs and assist specific business, corporate and government operations.

These handbooks provide a readily accessible source of background information relevant to the access needs of a particular business or operation. Included in each is a Checklist of issues to enable identification of areas where good access is already being provided and where improvements are needed.

The Checklist can also be used as a guide when planning changes or when selecting premises to establish a new business or operation. Specialist Handbooks can also be developed to meet your needs.
